PROFESSIONAL SUMMARY

B.Tech Artificial Intelligence and Data Science student graduating in 2027 with a CGPA of 8.28, proficient in Python, Java, and SQL, with hands-on experience in REST APIs, software development, AI/ML, and Docker/Kubernetes. Strong in problem-solving and interested in developing reliable, scalable software solutions.

TECHNICAL SKILLS

Programming: Python, Java, SQL, OOP, Data Structures & Algorithms

Web & Development: HTML, CSS, JavaScript, REST APIs, SDLC, Agile, Debugging, Software Testing, Code Optimization

Databases & Tools: MySQL, Data Modeling, Git, GitHub, Docker, Kubernetes, Power BI

Data & AI: Pandas, NumPy, Machine Learning, Deep Learning, Computer Vision, scikit-learn, TensorFlow, PyTorch, YOLOv8

EDUCATION

Ramco Institute of Technology, Anna University

2027

B.Tech — Artificial Intelligence & Data Science | CGPA: 8.28 (upto 5th Semester)

CBSE — Higher Secondary Certificate (HSC)

2023

Score: 72.4%

CBSE — Secondary School Leaving Certificate (SSLC)

2021

Score: 85.8%

INTERNSHIP EXPERIENCE

Flutter Intern, Abservetech Pvt. Ltd.

Jun 2025 – Jul 2025

Duration: 1 Month

- Developed cross-platform mobile application features using Flutter and Dart, building reusable UI components for production-facing screens.
- Integrated REST APIs to enable real-time data exchange between the mobile frontend and backend services.

Machine Learning Intern, Anjana Infotech

Feb 2025

Duration: 2 Weeks

- Performed data preprocessing, feature preparation, and cleaning on real-world datasets using Python, Pandas, and NumPy.
- Trained and evaluated machine learning models using scikit-learn, gaining hands-on experience with the end-to-end ML workflow.

PROJECTS

Kubernetes Auto-Scaling Simulation

- Simulated Kubernetes horizontal auto-scaling behavior using real-world workload traces to model production traffic patterns. Generated load using Locust and deployed on Minikube, analyzed scaling responsiveness and resource utilization to identify performance bottlenecks.

AI-Powered Road Accident Analysis System

- Built and trained ML models to predict accident risk, injury severity, and driver risk levels from historical road-safety data.
- Integrated YOLOv8 object detection for real-time vehicle identification and designed an interactive Streamlit dashboard to visualize predictions and risk metrics.

GAN-Based Face Anti-Spoofing System

- Built a deep learning-based system to classify real and spoofed faces by detecting spectral and temporal artifacts from print, replay, and screen attacks.

HACKATHONS & ACHIEVEMENTS

- Built and presented an AI-powered marketplace assistant prototype using Generative AI concepts at the Gen AI Exchange Hackathon 2025, organized by Google Cloud.
- Secured First Prize in Mission MapX at Datryx'26 a National Level Technical Symposium organized by Francis Xavier Engineering College.
- Developed real-world AI/ML solutions as a participant in Infosys PALS Techzooka, ECLearnix Hackathons, AI Escape Room, Google Hunt, and Code Conflux (NEC Kovilpatti).

CERTIFICATIONS

Google × Kaggle — AI Agents Intensive Course | Google Cloud Jams Program (GCP Hands-on Labs)

Tata GenAI & Data Analytics Job Simulation (Forage) | Data Engineering Masterclass — Hadoop, Spark & AWS

SOFT SKILLS & LANGUAGES

Soft Skills: Communication, Problem-Solving, Teamwork, Time Management | **Languages:** English, Tamil
